

eximo

Turf Conditioning Spray

Eximo® is a state of the art acid replacement soil conditioner powered by SynTech®, the world's only synthetic acid. Eximo is designed to be sprayed directly onto turf to solubilize calcium and other salts. Regular use will also lower soil bicarbonate levels and improve soil structure.

USE DIRECTIONS

Mix 32-64 ounces of Eximo in sufficient volume of water and apply to an acre of turf. Best results are achieved when Eximo is lightly watered into the soil profile after application.

Fill the spray tank 1/4 full. Add Eximo while continuing to fill the tank with the agitation unit running to ensure proper mixing. EMS recommends this range for 60-75 gallons of water per acre applied weekly for three weeks and bimonthly thereafter. Consult your local EMS dealer for usage rates in your region.

DISCARD

Rinse empty container w/water and discard as per federal, state and local regulations.

CONTAINS NON-PLANT FOOD INGREDIENTS GUARANTEED ANALYSIS

- 3% Cocamide
- 5% Coco esters
- 27% Soya Fatty Acids, ME Esters
- 65% Inert ingredients
